

## ENVIRONMENT POLICY

Our target, as an establishment having the consciousness of its duties and obligations towards environment and society, is the achievement of a Sustainable Development that will meet the requirements of current generations and without putting the requirements of future generations at jeopardy,

- With this approach, it is the fundamental policy of our establishment:
- To use the resources efficiently,
- To prevent pollution at its source and protect the environment,
- To conform to the legal and other conditions in force with relation to the environment,
- To enter the performance indicators pertaining to the environment in the Sustainable Development Report in quarterly periods, and follow up the environmental performance,
- To ensure the permanent improvement of the Environmental Management System for the increase of the environmental performance,
- To undertake the fulfilment of the conformance obligations of the Environmental Management System,
- To realize our activities in a manner to bring our negative environmental affects into the lowest level, and ensure the reduction of our wastes and search the ways of recycling of these wastes and under the circumstances where they cannot be recycled, then, provide disposal of the same through legal channels,
- To raise the environmental consciousness of our employees, and
- To determine any Emergency & Extraordinary circumstances and ensure necessary measures to be taken against them and make the environmental affects be controllable at maximum level against these circumstances.
